

Institutional Best Practices

1. Title- Waste management in the college campus

Objectives - Solid waste management is a major problem for many urban local bodies in India where urbanization and economic growth has resulted in increased solid waste generating per person. Context - In this G.C.E. Narnaul college the authorities have realized that there is a need to develop facilities to treat and dispose of increasing municipal waste. The Practice - College is regularly cleaned by cleaning staff. Segregation of different wastes is done. Biodegradable solid waste is regularly deposited in a pit. Evidence of Success- Students are taking part in the drive. Problem encountered - There is shortage of cleaning staff hence more resources person are required.

2. Title -Teacher -Students Guardian Scheme

Objectives – To bridge the gap between teacher students through interaction. As 70%t admitted students are from rural background. They are shy in nature and hesitate to interact with teacher, hence to enhance their communication skills, confidence and to make help in their problems. Practice - At the beginning of academic year students are allotted to all faculty members in class section wise. We have counseling of interests, career choice, their problems. Every Saturday with them meeting is done. Evidence of Success - Healthy relationship between teacher and students is established. Due to this, there is no ragging event happened in G.C.E. Narnaul college. Students confidence level boosted up. Student's participation in extra curriculum activities has been increased. Problems encountered - Initially this activity takes more time to motivate the students to share their problems.
